# Synthetic Datasets Statistical Disclosure Control

**comparing fully and partially synthetic datasets for ...** - vide disclosure control by generating synthetic datasets: the first, proposed by rubin [1], generates fully synthetic datasets while the second suggested by little [2] imputes values only for selected variables that bear a high risk of disclosure. **simultaneous use of multiple imputation for missing data ...** - release partially synthetic datasets, comprising the units originally surveyed with some collected values, such as sensitive values at high risk of disclosure or values of key identifiers, replaced with multiple **the modernization of statistical disclosure limitation at ...** - the modernization of statistical disclosure limitation at the u.s. census bureau aref n. dajani1, ... are many challenges in adopting formally private algorithms to datasets with high dimensionality and the ... the modernization of statistical disclosure limitation at the u.s. census bureau **chapter 8 multiple imputation for nonresponse and ...** - multiple imputation for nonresponse and statistical disclosure control1 most if not all surveys are subject to item nonresponse, and even registers can contain missing values, if implausible values are set to missing during the data-editing process. since the generation of synthetic datasets is based on the ideas of multi- **improved variance estimation for fully synthetic datasets** - fully synthetic datasets, i.e. datasets that only contain simulated values, arguably provide a very high level of data protection. since all values are simulated re- ... of approaches have been suggested in the literature on statistical disclosure control to enable data dissemination without violating confidentiality restrictions (willenborg ... **data confidentiality and statistical disclosure control ...** - synthetic datasets for statistical disclosure control. theory and implementation. lecture notes in statistics, 201, new york: springer academic conduct clear definitions of the forms of academic misconduct, including cheating and plagiarism, as well as information about disciplinary sanctions for academic **satisfying disclosure restrictions with synthetic data sets** - satisfying disclosure restrictions with synthetic data sets jerome p. reiter key words: confidentiality, disclosure, multiple imputation, simulation, ... statistical procedures that are valid for the original data are valid for ... to changes in the number of synthetic data sets, the number of synthetic units, and the inclusion of design ... **thesis proposal: creation and analysis of differentially ...** - statistical datasets can be restricted in two ways: via data reduction or data perturbation. an common method for data reduction is releasing only a subsample of the collected data, **simultaneous edit-imputation and disclosure limitation for ...** - of statistical disclosure control methods. in this article, we present an approach to make public use files for a subset of widely-used variables from the cmf. our approach relies on generating synthetic datasets [8, 10, 26, 31, 34, 35], in which we release simulated establishment data comprising 2 **comparative evaluation of synthetic dataset generation methods** - i fully synthetic dataset generation i guarantees the least disclosure risk i computationally expensive i loses some utility due to full data synthesis i partially synthetic dataset generation i provides good utility as many datapoints are retained without synthesis i possesses more disclosure risk than fully synthetic datasets i ... **an empirical evaluation of easily implemented ...** - synthetic dataset that provide reliable estimates and low disclosure risks, and that these synthesizers can be implemented easily by statistical agencies. keywords: census, confidentiality, disclosure, imputation, microdata, synthetic 1. introduction one of the primary missions of most national statistical agencies is to disseminate data to the ... **disclosure risk and data utility for partially synthetic ...** - disclosure or values of key identifiers, replaced with multiple imputations. these are called partially synthetic datasets (reiter, 2003). in recent years, statistical agencies have begun to use partially synthetic approaches to create public use data for major surveys. for example, in 2007 the u.s. census bureau **overview of statistical disclosure limitation** - statistical disclosure limitation (control) methods apply to microdata and/or tabulated data before release data masking: transform the original data (matrix  $x$ ) to the disseminated data ( $y$ ) **synthetic datasets for the german iab establishment panel** - risk of disclosure. thus, a careful disclosure risk evaluation is necessary with this approach before any actual data release. this paper describes the generation of partially synthetic datasets for one wave of
