
System Level Modeling Design Space Exploration

system-level design methodology - webu - system-level design methodology daniel d. gajski center for embedded computer systems university of california, irvine ... system design environment and demonstrated in practice more than 1000x productivity gain. 2 ... modeling as algebra **system level modeling and circuit design for low voltage ...** - system-level modeling and circuit design for low voltage cmos equalizer for coaxial cable for video application by han zhang a new method of modeling coaxial cable frequency response with genetic algorithm was introduced. a system-level multi-stages adaptive equalizer model with **an introduction to system level modeling in systemc 2** - general for system-level modeling. for example, in a system level design, a designer might want to specify that several modules communicate using queues, or that several processes execute concurrently and manage access to shared global data using mutexes. **system-level modeling and design of integrated mems** - system-level modeling and design of integrated mems c. carnegie mellon system design bottleneck increasing gap between technology advancement and ability to design new systems [sia] design team sizes need to increase to eliminate gap 0.001 0.01 0.1 1 10 100 1000 10000 1960 1980 2000 2020 0.001 0.01 0.1 1 10 100 1000 10000 moore's law design ... **communication modeling for system-level design** - communication modeling for system-level design ... accuracy of our models on system-level design choices and also presents a case study in which we compare common noc and bus-based architectures. finally, section v concludes and gives directions for future work. ii. **transaction level modeling in system level design - ceccs** - transaction level modeling in system level design lukai cai and daniel gajski ... recently, the transaction-level modeling is widely referred to in system level design literature. however, the transaction- ... transaction level modeling in system level design lukai cai and daniel gajski **system-level modeling and design of microfluidic ...** - system-level modeling and design of microfluidic concentration gradient generators yi wang¹, tamal mukherjee², qiao lin³, * 1cfd research corporation, u.s.a. 2department of electrical and computer engineering, carnegie mellon university, u.s.a. 3department of mechanical engineering, columbia university, u.s.a. **system level modeling of a h.264 decoder** - system level modeling of a h.264 decoder ... system level design languages (sldl), like specc or systemc, are promising approaches to solve this problem. in this report, we demonstrate the modeling of a h.264 decoder example of an industry-sized multi-media application. we first describe the essential features of the h.264 algorithm and its **system-level modeling of a network-on-chip** - system-level operation of the noc, we provide simulation results for various scheduling criteria, injection rates, buffer sizes, and network traffic patterns. keywords: network-on-chip, system-level design, concurrency modeling, system modeling, models of computation 1. introduction **implementing thermal management modeling into sofc system ...** - implementing thermal management modeling into sofc system level design effective thermal management is critical to the successful design of small 10 kw solid oxide fuel cell (sofc) power systems. while separate unit processes occur within each component of the system, external heat transport from/to components must be op- **rtos modeling for system level design** - system models are used in system level design for early de-sign exploration. while real time operating systems (rtos) are an increasingly important component in system design, specific rtos implementations can not be used directly in high level models. on the other hand, existing system level design languages (sldl) lack support for rtos modeling.
